EHP To Host Public Policy Summit “Shale Gas & Public Health: Translating Science into Policy”

The Environmental Health Project will host a public health summit, **Shale Gas & Public Health: Translating Science into Policy**. The summit will feature prominent speakers in four key policy areas: endocrine disruption, child health and development, environmental economics, and environmental justice. The summit will include breakout sessions on each of these topics, and time is reserved for a panel discussion and questions led by EHP’s executive director, Alison L. Steele.

Members of the media are welcome to attend. All speakers will be available for interviews following the event.

Date: Tuesday, February 22, 2022
Time: 10 a.m. – 3 p.m. (Eastern Time)
Location: Zoom (link to be provided after registration)

Register for this event [here](#).

About Environmental Health Project

The [Environmental Health Project](#) (EHP) is a nonprofit public health organization that defends public health in the face of shale gas development. We provide frontline communities with timely monitoring, interpretation, and guidance. We engage diverse stakeholders: health professionals, researchers, community organizers, public servants, and others. We do so because knowledge protects health.
